**THE WACO EXAMINER**

WACO, TEXAS, OCT. 21, 1885.

**TEXAS PRESS ASSOCIATION.**

To the Members of the Executive Committee of the Texas Press Association.

WHEREAS, Judge T. J. Girardeau has resigned the presidency of the Texas Press Association, and left the duties of said office devolving on me, and feeling that the interest of said association will be best served by calling a meeting of the executive committee, the members of said committee are hereby notified and requested to meet in the city of Waco, in the parlors of the Pacific hotel, on Tuesday, November 10th, A. D. 1885, for the purpose of designating the time of the next regular meeting of the association in the city of San Antonio, and arrange for an excursion to the city of Mexico, or elsewhere, as may suit the committee, and for the transaction of the general business of the association.

Arrangements have been made for special rates at the Pacific hotel, and ample accommodation for the whole delegation. The Waco Fair and Race Course will be open and in season, and arrangements have been made with Captain S. Johnson, secretary of the Fair association, for open gates to the delegation for the entire four days.

The meeting will be called to order on Tuesday, November 10th, in the parlors of the Pacific hotel.

We earnestly desire a full attendance of the committee, and any members of the press who may visit us during our meeting will be accorded a seat and full privileges and courtesies of membership. All officers of the association are ex-officio members of the committee, and we respectfully desire their presence.

All papers friendly to our cause will please copy this call.

With best wishes for the advancement of the press and the Texas Press Association.

J. H. DAVIS,  
De facto President.

**KILLED BY A SKUNK.**

A Valuable Dog is Bitten and Dies in Less Than Three Minutes.

Dr. J. M. Lillard, who resides at Durango, Falls county, lost a valuable dog last week, which was caused by the bite of a skunk. The family became aware of the presence of the little animal by its odoriferousness, and the doctor took a lamp and in making a search saw the skunk under the house. His big bull dog followed him, and seeing the animal made a dash for it, opening his mouth very wide as it attempted to take it up in his jaw. The doctor was only a few feet away and saw the skunk as it made fight, and he thought the dog was bitten on the tongue, as it turned and ran from under the house, and lying down on the ground died in less than three minutes without making any noise whatever. The skunk was afterwards shot and killed.

**Worse Than Snake Bites.**

A band of confidence operators has been let loose in this vicinity to prey upon and annoy our housekeepers.

The band is composed of women, although employed and directed by an agent of the other sex, and their method of procedure, as explained by several ladies who have been victimized, is as follows: Ob-taining access to the kitchen, they introduce the subject of baking powder, inquiring the kind used in the family. Being shown the can, perhaps a fresh, full one, they volunteer to "test" it to ascertain its quality. Their "test" consists in placing the can on a hot stove or over a lamp or gas jet, or in mixing the baking powder with water both hot and cold. If the baking powder is good, anything the heat will, of course, expand the gas, which, being ammoniacal or carbonic, is apparent to the sense of smell. The claim is then made that this odor indicates something detrimental, although as a matter of fact, a baking powder that would give off no gas when subjected to heat, would be without leavening power and val-

ueses. They will also mix the baking powder given them with water. If pure it effervesces quickly. The baking powder they peddle being similarly mixed foams up slowly. This they claim as evidence of superiority, whereas it is the exhibition of a trick only, as this effect is caused by the presence of flour in the baking powder they are peddling.

Of course the object of these fraudulent tricks is to destroy confidence in all other kinds of baking powder, and to sell the particular brand for which the women are traveling.

Were this the whole of the operation, housekeeping would not often be deceived. Every intelligent person knows that baking powder is not made to be used in this way, but in cooking where its action is entirely different from that produced by dry heat or by mixture with water alone.

The chief object of this jugglery is to destroy the baking powder given for testing, or by heating it to drive off its leavening gases, and so weaken it, so that when used it will fail to work.

At the next baking there is heavy feed, of course, and the "tramp" probably gets the credit of having sold the housekeeper a valuable cake.

Instead of having spoiled her baking powder, as was actually the case, the average "tramp" will in this way, destroy fifty to seventy-five pounds of baking powder a day.

A second method of spoiling for use the baking powder in a kitchen where they are not permitted to experiment with it, is by dexterously throwing in the can a small quantity of salt, soda, or powdered lime.

Again, should the chance be in baking powder in the house, the operators will produce, of the kind used by the family, a sample that has been purposely adulterated or "doctored" to make such an exhibit as they desire under the so-called test.

The only way to protect our food from being contaminated by tramps of this kind is to turn all persons who wish or attempt to tamper with it out ceremoniously from the door, and to use those articles, only, which experience has proved satisfactory, or as the official tests have established as pure and wholesome.
